

Alexandria 5.4.4.5 Release Notes

All users should upgrade to this version.

***** Before updating, backup or archive your data first. *****

***** If you are using OS X for the data station, librarian workstation, or researcher, you must empty the trash before launching the new update. Due to an OS limitation, if you do not empty the trash, it will launch the old application that resides in the trash and will constantly tell you to update. If it is your data station that is in the trash, it will ask for registration codes and create a NEW EMPTY data file. *****

NOTE: If you are registered and using Macintosh clients, depending on the version you are utilizing, the automatic update may not work and will thus require that you delete the Librarian Workstation or Researcher and reinstall using the web installation or standard client installer.

NOTE: Due to completed and ongoing enhancements to authority control records, subject authority is still disabled in this version.

NOTE: In order to run the Sneak Peek Utilities, QuickTime must be installed on the Data Station and on the Workstations. To download Quick Time, see <http://www.apple.com/quicktime/download/standalone/>

Recommendations for Data Stations & Librarian Workstations

Macintosh

OS 9.2.2

G3 or G4

CarbonLib 1.6 - REQUIRED

256 MB RAM or more recommended

1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

Macintosh OS 10.2 or higher

G3 or G4

256 MB RAM or more recommended

1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

Windows

Pentium III or Pentium IV, 500 MHz
Windows 98 Second Edition or higher
256 MB or more recommended
1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

Recommendations for Researchers

Macintosh OS 9.1

G3 or G4
CarbonLib 1.6 - REQUIRED
64 MB RAM or more recommended
1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

Macintosh OS 10.2 or higher

G3 or G4
64 MB RAM or more recommended
1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

Windows

Pentium III or Pentium IV, 500 MHz
Windows 98 Second Edition or higher
64 MB or more recommended
1024 x 760 recommended (Minimum resolution 800 x 600 minimum), 256 colors

The greater of the memory and processor minimum requirements between the Alexandria application and the Operating System will be required. i.e. If the Alexandria Researcher for Windows requires 64 MB of memory but it will be running on XP, which requires 128 MB of memory, then in such an instance, 128 MB of memory becomes the new minimum requirement.

Major Features of Alexandria 5.4.4.5

- Improved stability.
- Multiple word searches on the web in the All Words category once again work.
- Sneak Peek utility option, "Reconnect for Every Item", has been improved to handle when a connection is dropped.
