

Partnerships & Integrations

While all libraries should serve as the hub of school resources, not all libraries and patrons are equal! You understand the needs of your students and patrons better than anyone, and Alexandria provides a "One-Size-Fits-Me" solution. Our partnerships with the best-in-class library solution providers, give you the freedom to choose which resources are going to serve your students best, providing you that "One-Size-Fits-Me" integrated library system!

ASSET MANAGEMENT

As diverse as library usage is, so are your library's resources. S.T.E.M. and S.T.E.A.M. kits, makerspace tools, supplies and technology require a comprehensive inventory and cataloging solution. With our fully-integrated Textbook and Asset Management module, libraries can easily distribute, track, and report on textbooks, tools, devices, Chromebooks, and any other asset without distorting their library circulation statistics. Textbook Tracker is designed with the same look-and-feel as Alexandria to reduce the learning curve and make it as intuitive to use as possible.

Textbook Tracker

Textbook Tracker is a complete solution for circulating your textbooks and assets. With Textbook Tracker you can view all current patron and item information from one, easy-to-use screen. Every action is recorded in detail in the transaction log, and helpful information about the current item is shown as well. Daily activities such as circulation, inventory, fines, and book condition adjustments are all performed from the circulation window.

Textbook Tracker includes a full complement of reporting features to help you extract the critical information you need. Included are special, patron, item, and circulation reports to calculate usage statistics, create custom barcode labels, overdue listing and notices, calculate fines, and much more!
